

Scale Logic and CatDV solving challenges for editors

Scale Logic and CatDV provide a bundled solution designed for workflows where storage and media asset management are not only crucial, but the foundation for efficient video production and organization.

- *Access to assets via Web Browser, Embedded NLE plugins and powerful logging applications*
- *Provides visibility to any asset across any department from anywhere*
- *Broadcast, Film & Video, Post, VFX, VOD, OTT, and IPTV, all scalable with high-availability*
- *Hands-off storage administration for editors*
- *Remote proxy editing*
- *View and navigate online and archived assets*
- *Powerful search with extensive workflow automation*
- *Customized capacity and connectivity*
- *Add long-term protection on disk, LTO and/or Cloud*

Time pressure puts data in media production at high risk. User errors are the most common threat. Storage fills up faster than ever due to large production formats. The management of assets for time and efficiency is an ever increasing concern. Scale Logic Genesis Storage Platform is an all-in-one integrated SAN and MAM enhanced by the powerful CatDV application to offer an extremely attractive solution for asset management and storage.

Unlike many asset management systems CatDV is easy to learn and deploy, has one of the lowest costs of ownership in its sector, has great support and an unrivaled ability to integrate with other products, platforms, formats, hardware and software. Ultimately this overall solution helps companies find, reuse and protect their media assets, helps teams to collaborate, edit and to get more done, saving both time and money.
