

Best ROI in the Industry

1000s of Customers

30+ Years in M&E

Vetted Industry Partnerships

SAN

Busy editing (24x7) and need to ensure zero downtime and optimal efficiency?

Our Genesis RX3 and HyperMDC provide the backbone for performance and reliability for complex video workgroups needing speeds up to 18GB/sec.

NAS

NAS can be used as 2nd tier storage and can also be used as primary shared storage device.

Our Genesis NX2 and ZX provide enterprise-class solutions that scale out in clustered nodes and can grow to capacities over 5PB.

Data Management

We have answers to most of your data management concerns/questions.

Our expertise lies in managing increasing file size and performance requirements while partnering with best-of-breed tool sets.

- *Best cost per GB and ROI including 5 year CAPEX support*
- *Easy scale out capacity with either storage or compute*
- *8/16/32Gb/s FC and 10/25/40/100Gb/s Ethernet*
- *Rock-solid file system for asset protection via metro clustering and unlimited snapshots*
- *High-performance for ethernet-based workgroups*
- *Multiple options for backup and offsite recovery for protection and business continuity*
- *We work with industry-leading vendors*
- *It's not just theory, we actually emulate workflows in our lab while doing real-time testing*
- *Experienced through 1000s of system installations worldwide across various verticals*
