

Houses of Worship demand robust solutions for their broadcast workflows.

When organizations need a solid and reliable solution to store and deliver content for broadcast and video production they have turned to Scale Logic (SLI). As venues and digital asset requirements change, SLI has evolved into a full service company that can provide end-to-end solutions from content capture and playback to extending the ROI of valuable production storage and networking.

Our products and services

- *Hybrid storage application platforms*
- *Enterprise NAS storage and file servers*
- *Cost-effective metadata controllers*
- *XFS, ZFS and HyperFS file system management*
- *FC, Ethernet and iSCSI networking options*
- *Customized extended warranty programs for major OEMs*
- *Refurbished and certified nodes, clusters and switches*
- *Buyback and trade in programs with refresh*
- *Certified asset recycling*
- *Integration and design*

CHURCH

Hybrid storage for broadcasting and multi-site playback

Since 1996, Beltway has grown in attendance to almost 4,500 on two campuses in a community of 120,000. Their requirements for reliable video production and content delivery needed to expand with capacity and performance.

Our customer says it all

“Scale Logic provided a flexible and upgradeable system across a seven year lifespan. They worked with us at the Engineer to CIO level to ensure compatibility, uptime and reliability. Some organizations like ours either have experts in house or externally contract these type services. Scale Logic is positioned to support its customers regardless of the customers level of internal support/expertise.” - John Inwood, Beltway Park Church

- Genesis RX2 primary and 2nd instance storage
- Genesis HyperMDC 100S metadata control
- Genesis Unlimited SAN storage
- HyperFS file system management

Beltway Park’s multi-site production environment

Customized warranties and infrastructure support

The church is headquartered in Salt Lake City, Utah and has established congregations and built temples worldwide with over 70,000 missionaries and a membership of over 15 million.

Our partners bring value

“The LDS Motion Picture Studio consisted of five clusters of Isilon with about 3.5PB of capacity. They received a renewal quote from Isilon that was over 500K. We had an initial discovery call with Scale Logic and it couldn’t have gone better. Scale Logic connected us with a reference customer in Salt Lake that was more than willing to share their (fantastic) experience. The entire experience was well managed and they have been proactive about setting up remote monitoring and other services that put our customer at ease about their decision to move away from Isilon support. It’s been a great experience for everyone so far and I don’t anticipate that changing.” - Tyler Berry, ASG
