

Customer Highlight: Clemson University

Clemson University is an American public, co-educational, land-grant and sea-grant research university in Clemson, South Carolina.

Customer Challenge

Clemson University was looking for a solution for 5-10 seat SAN with split locations of the primary editing stations. SLI and our channel partner quoted and won the install using a Genesis IAP metadata server and HyperFS with a Genesis RX 36 bay 72TB RAID as primary storage.

The Solution

The SAN provided multiple iMac Adobe Premiere Editing stations, two being co-located on campus, access to the SAN workflow. Long wave SFP's were installed to connect both buildings together on a single shared network. Lastly, remote training of the entire system was provided upon completion of the install.

Components

- Genesis RX 36 bay
- Genesis HyperMDC metadata server
- HyperFS SAN sharing editing with site B
- FC and Ethernet Switches
- ATTO Thunderbolt
- Adobe CC workgroup
